

## DESIGN

### Table:teacher

Create table teacher (id int,name varchar(50),class int,section varchar(20),sex varchar(20),nationality varchar(50),salary int,subject varchar(100));

```
mysql> select*from teacher;
```

id	name	class	section	sex	nationality	salary	subject
1	Dhivya	12	M	F	INDIAN	25000	Computer Science
2	Siju	12	M	M	INDIAN	25000	Arabic
3	Timble	12	N	F	INDIAN	25000	Chemistry
4	Deepthi	12	N	F	INDIAN	25000	Physics
5	Ansari	12	Q	M	INDIAN	25000	Maths

5 rows in set (0.00 sec)

### Table: student

Create table student(id int,name varchar(50),class int,section varchar(20),sex varchar(20),nationality varchar(50);

```
mysql> select*from student;
```

id	name	class	section	sex	nationality
1	BEN	12	M	M	INDIAN
2	BENNET	12	M	M	INDIAN
3	SHAHANOON	12	N	M	INDIAN
5	JEFFREY	12	Q	M	INDIAN
6	SANJO	12	Q	M	INDIAN
7	MANOJ	12	P	M	INDIAN
8	FLOYD	12	M	M	INDIAN

7 rows in set (0.01 sec)

## Table:attendance

Create table attendance (name varchar(100),date varchar(100),attendance varchar(20);

```
mysql> select*from attendance;
```

name	date	attendance
BEN	25/02/2004	P
BENNET	25/02/2004	P
SHAHANOON	25/02/2004	P
JEFFREY	25/02/2004	P
SANJO	25/02/2004	P
MANOJ	25/02/2004	P
FLOYD	25/02/2004	P

```
7 rows in set (0.01 sec)
```
